

Performance Metrics Tool — Design Document

Generated by walking through a live instance of the app (`uvicorn app:app`) using two demo accounts created through the app's own Sign Up flow:

Role	Name	Email	Reports To
Manager	Priya Manager	priya.manager@demo.com	—
SDET	Arjun SDET	arjun.sdet@demo.com	priya.manager@demo.com

All screenshots below are real captures from the running application (`docs/design/screenshots/`).

1. High-Level Architecture

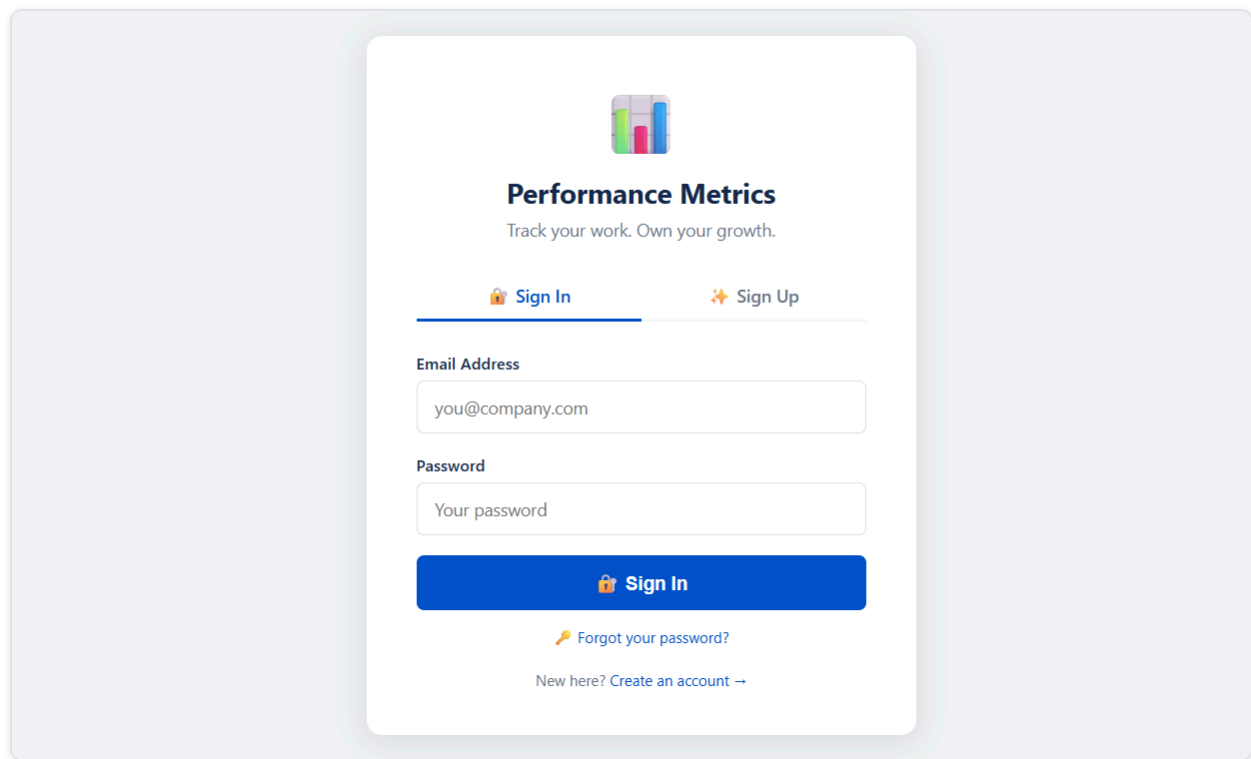

2. User Roles & Access Mapping

Page	Route	Who can access it
Login / Sign up	<code>/login</code>	Anyone (unauthenticated)
My Data	<code>/user</code>	Any logged-in user — manages their own metric entries
My Jira Assignments	<code>/jira-assignments</code>	Any logged-in user — their own Jira-derived counts
Jira Authentication	<code>/jira-auth</code>	Any logged-in user — connect a personal Jira API token
Manager Dashboard	<code>/dashboard</code>	Managers — view reportees' entries, Jira metrics & calculator
Admin Panel	<code>/admin</code>	Single hard-coded admin email only (<code>ADMIN_EMAIL</code> in <code>app.py</code>)
Reset Password	<code>/reset-password</code>	Anyone with a valid, time-limited reset link

Manager-to-reportee mapping is driven by the `manager_email` field captured at sign-up (`storage.py` / `models.py`) — a reportee automatically appears in their manager's **"View Team Member"** dropdown on the dashboard.

3. Flow 1 — Sign In / Sign Up

New users self-register with **Name, Work Email, Role, (optional) Manager's Email, Password**. Entering a manager's email is what links an SDET/QA Lead to a Manager's dashboard.

The image shows a login and signup form titled "Performance Metrics" with the tagline "Track your work. Own your growth." At the top is a bar chart icon. Below the title are two links: "Sign In" (with a lock icon) and "Sign Up" (with a star icon). A horizontal line separates these from the input fields. There are two input fields: "Email Address" containing "you@company.com" and "Password" containing "Your password". Below these is a blue "Sign In" button with a lock icon. Under the button is a link "Forgot your password?" with a key icon. At the bottom is a link "New here? Create an account →".

Total			14	14	

5. Flow 3 — Individual Contributor: "My Jira Assignments" (/jira-assignments)

Each user can also see Jira-derived counts (Stories/Defects/Bugs/Tests assigned or reported), each with a **"Show by space"** breakdown and a direct **"Open Jira search"** deep link. If the user hasn't connected Jira credentials yet, counts default to `0` (no error) — the JQL links are still generated using the user's email:

6. Flow 4 — Manager Dashboard (/dashboard)

6.1 Empty state — no team member selected yet

The manager's own reportees (matched by `manager_email`) populate the dropdown automatically.

6.2 Selecting a team member

Choosing a reportee reveals: - **Summary tiles** — column **totals** (not averages) for every numeric metric field -  **Manual Entries** — the reportee's raw entries, searchable/sortable/date-filterable -  **Jira Metrics** — the same Jira breakdown shown on the reportee's own Jira page

6.3 Collapse / Expand sections

Both **Manual Entries** and **Jira Metrics** headers have a  toggle so a manager can collapse either section (including its filter bar) independently:

The screenshot shows a dashboard interface for a manager named Priya. At the top, there's a blue header with the title "Dashboard" and the user name "Priya Manager". On the right side of the header, there are three buttons: "My Metrics", "My Jira Assignments", and "Sign Out".

Below the header, there's a section for "View Team Member" with a dropdown menu showing "Arjun SDET (SDET)". Below this, there's a card for "Arjun SDET" with the email "arjun.sdet@demo.com", the role "SDET", and the reports to "priya.manager@demo.com".

The dashboard features several summary cards with counts:

- Total Entries: 2
- Total User Stories: 14
- Total Valid Defects: 14
- Total Invalid Defects: 3
- Total P0 Leaked: 1
- Total Complex Stories: 3
- Total Volunteer Opps: 3
- Total Demo Opps: 1

Below these cards, there's a section for "Manual Entries" with a collapse/expand toggle icon. To the right of this section, there's a blue circular button with a grid icon and a notification badge showing "2".

The "Jira Metrics" section is expanded, showing a filter bar with the following fields:

- Release / Fix Version: e.g. AA.R.4.0.0
- Created From: mm/dd/yyyy
- Created To: mm/dd/yyyy
- Buttons: Apply, X Clear

The "Jira Metrics" section contains eight cards, each with a count of 0 and a "Show by space" button:

- Stories Assigned: 0
- Defects Assigned: 0
- Defects Reported: 0
- Bugs Assigned: 0
- Bugs Reported: 0
- Tests Assigned: 0
- Test Plans Assigned: 0
- Test Executions Assigned: 0

Each card also has a link to "Open Jira search".

6.4 Jira card space breakdown

Each Jira tile's **"Show by space"** expands into a per-space count list in place:

7. Flow 5 — Weightage Calculator (floating widget)

A floating  chat-bubble icon (bottom-right of the dashboard) opens a **non-blocking, resizable** panel so managers can keep working with Manual Entries while it's open.

- Selecting a team member **auto-selects the matching Role** (SDET / Lead Engineer) and **pre-fills "Actual" values** from that employee's real metric totals.
- Manager can override any value, then click **Calculate** to see a per-metric score ($\min(\text{actual}/\text{target}, 1) \times \text{weightage}$ for positive weightage, uncapped for penalty/negative weightage rows) and a **Total Weighted Score**.
- Panel edges (top, left, and top-left corner) are draggable, PowerPoint-style, to resize; closing the panel resets it back to its default size.

9. Flow 7 — Password Reset

Reset links are single-use and expire after 1 hour; an invalid/expired link shows a clear error and a way back to sign-in:

10. End-to-End Flow Summary

11. Notes on Metric-to-Weightage Mapping

The Weightage Calculator's targets/weightages mirror the org scorecard:

Metric field	SDET target / weight	Lead Engineer target / weight
user_stories_completed	40 / 45%	45 / 35%
valid_defects	80 / 18%	95 / 13%
invalid_defects	5 / -2%	3 / -2%
volunteer_opportunities	5 / 5%	— (Lead Eng. uses "Initiatives Proposed", manual entry only)
p0_defects_leaked	2 / -15%	1 / -25%
complex_stories	12 / 10%	12 / 10%
demo_opportunities	12 / 5%	20 / 5%

Negative weightages act as penalties — their score contribution is uncapped (more defects/leaks reduce the total further), while positive weightages cap credit at 100% of target.
